REQUESTS FOR APPLICATIONS

TITLE: Consortium for the Study of Chronic Pancreatitis, Diabetes and Pancreatic Cancer Clinical Centers (CSCPDPCCCs) (U01)
(RFA-DK-14-027)
SPONSOR: National Cancer Institute, National Institute of Diabetes and Digestive and Kidney Diseases
Application Receipt Date(s): April 02, 2015

TITLE: Consortium for the Study of Chronic Pancreatitis, Diabetes and Pancreatic Cancer Coordination and Data Management Center (CSCPDCDCDMC) (U01)
(RFA-DK-14-028)
SPONSOR: National Cancer Institute, National Institute of Diabetes and Digestive and Kidney Diseases
Application Receipt Date(s): April 02, 2015

TITLE: Children’s Environmental Health and Disease Prevention Research Centers (P50)
(RFA-ES-14-002)
SPONSOR: Environmental Protection Agency, National Center for Environmental Research, National Institute of Environmental Health Sciences
Application Receipt Date(s): December 22, 2014

TITLE: Regional Consortia for High Resolution Cryoelectron Microscopy (U24)
(RFA-GM-16-001)
SPONSOR: National Institute of General Medical Sciences
Application Receipt Date(s): January 27, 2015

TITLE: Facile Methods and Technologies for Synthesis of Biomedically Relevant Carbohydrates (U01)
(RFA-RM-14-015)
SPONSOR: NIH Roadmap Initiatives, National Institute of General Medical Sciences, The Common Fund/Office of Strategic Coordination
Application Receipt Date(s): December 10, 2014

TITLE: Nuclear Organization and Function Interdisciplinary Consortium (NOFIC)(U54)
(RFA-RM-14-006)
SPONSOR: NIH Roadmap Initiatives, National Institute of Diabetes and Digestive and Kidney Diseases, The Common Fund/Office of Strategic Coordination
Application Receipt Date(s): December 16, 2014

• **TITLE: Nucleome Network Organizational Hub (U01)**
  (RFA-RM-14-010)
  SPONSOR: NIH Roadmap Initiatives, **National Cancer Institute (NCI)**, The Common Fund/Office of Strategic Coordination
  **Synopsis:** The purpose of this FOA is to identify and support an Organizational Hub (OH) that will provide the administrative infrastructure for the 4D Nucleome Network, a collaborative research network being launched by the NIH Common Fund to support innovative research and tool development for further understanding the nuclear organization of mammalian genomes in space and time.
  Application Receipt Date(s): December 16, 2014

• **TITLE: Novel and Innovative Tools to Facilitate Identification, Tracking, Manipulation, and Analysis of Glycans and their Functions (R21)**
  (RFA-RM-14-014)
  SPONSOR: **National Cancer Institute (NCI)**
  **Synopsis:** The Common Fund Program - Accelerating Translation of Glycoscience: Integration and Accessibility - aims to develop accessible and affordable new tools and technologies for studying carbohydrates that will enable researchers in all biomedical fields to dramatically advance our understanding of the roles of these complex molecules in health and disease and to not abandon glycan discovery due to the difficulty or inability to study them.
  Application Receipt/Submission Date(s): November 10, 2014

• **TITLE: Novel and Innovative Tools to Facilitate Identification, Tracking, Manipulation, and Analysis of Glycans and their Functions (U01)**
  (RFA-RM-14-013)
  SPONSOR: **National Institutes of Health**
  **Synopsis:** The Common Fund Program - Accelerating Translation of Glycoscience: Integration and Accessibility - aims to develop accessible and affordable new tools and technologies for studying carbohydrates that will enable researchers in all biomedical fields to dramatically advance our understanding of the roles of these complex molecules in health and disease and to not abandon glycan discovery due to the difficulty or inability to study them.
  Application Receipt/Submission Date(s): November 10, 2014

• **TITLE: 4D Nucleome Network Data Coordination and Integration Center (U01)**
  (RFA-RM-14-011)
  SPONSOR: NIH Roadmap Initiatives, **National Cancer Institute (NCI)**, The Common Fund/Office of Strategic Coordination
  **Synopsis:** The purpose of this Funding Opportunity Announcement (FOA) is to identify and support a Four-Dimensional Nucleome (4DN) Network Data Coordination and Integration Center (DCIC). The overarching mission of 4DN-DCIC will be to collect, store, curate, and display all data, metadata, and analysis tools generated by the 4DN Network. The DCIC will also assist in the development and dissemination of metadata and standards to be adopted by the community at large, approaches for integrative analysis of a wide-range of data types, and visualization and analysis tools to facilitate access and understanding of complex datasets to non-expert users.
  Application Receipt Date(s): December 16, 2014

• **TITLE: Model Organisms Screening Center for the Undiagnosed Diseases Network (UDN) (U54)**
  (RFA-RM-14-016)
  SPONSOR: NIH Roadmap Initiatives, National Institute of Neurological Disorders and Stroke, The Common Fund/Office of Strategic Coordination
  Application Receipt Date(s): December 16, 2014

• **TITLE: System-Level Health Services and Policy Research on Health Disparities (R01)**
  (RFA-MD-15-001)
  National Institute on Minority Health and Health Disparities
  Application Receipt Date(s): January 20, 2015

• **TITLE: Technologies for Improving Minority Health and Eliminating Health Disparities (R41/R42)**
  (RFA-MD-15-003)
  National Institute on Minority Health and Health Disparities
  Application Receipt Date(s): January 23, 2015

• **TITLE: Innovations for Healthy Living - Improving Minority Health and Eliminating Health Disparities (R43)**
  (RFA-MD-15-004)
PROGRAM ANNOUNCEMENTS

- **TITLE:** Limited Competition for the Continuation of Rare Diseases Clinical Research Consortia in the Rare Diseases Clinical Research Network (U54)
  (PAR-15-019)
  **SPONSOR:** National Institute of Neurological Disorders and Stroke, National Center for Advancing Translational Sciences
  National Cancer Institute
  **Synopsis:** This Funding Opportunity Announcement (FOA) is limited to those Program Director(s)/Principal Investigator(s) of Rare Diseases Clinical Research Consortia (RDCRC) who received an NINDS award under the Rare Diseases Clinical Research Network (RDCRN) program through RFA-TR-13-002, or an NCI award through RFA-OD-08-001
  Application Receipt/Submission Date(s): December 16, 2014

- **TITLE:** Spatial Uncertainty: Data, Modeling, and Communication (R21)
  (PA-15-009)
  **SPONSOR:** National Cancer Institute, National Institute of Environmental Health Sciences
  **Synopsis:** The goal of this funding opportunity announcement (FOA) is to facilitate multidisciplinary collaborations among researchers to promote research in identifying, quantifying, and communicating spatial uncertainty in health research to improve disease control and prevention. An additional goal of this reissuance is to facilitate integration of data collection, information technology, visualization tools, statistical models, and health communication to reduce spatial uncertainty in the planning, implementation, and evaluation of disease control programs. Applications for R21 awards should describe projects distinct from those supported through the traditional R01 activity code. For example, long-term projects, or projects designed to increase knowledge in a well-established area, will not be considered for R21 awards. Applications submitted to this FOA should be exploratory and novel.
  Application Receipt/Submission Date(s): Multiple dates, see announcement.

- **TITLE:** Spatial Uncertainty: Data, Modeling, and Communication (R01)
  (PA-15-010)
  **SPONSOR:** National Cancer Institute, National Institute of Environmental Health Sciences
  **Synopsis:** The purpose of this funding opportunity announcement (FOA) is to support innovative research that identifies sources of spatial uncertainty (i.e., inaccuracy or instability of spatial or geographic information) in public health data, incorporates the inaccuracy or instability into statistical methods, and develops novel tools to visualize the nature and consequences of spatial uncertainty.
  Application Receipt/Submission Date(s): Multiple dates, see announcement.

- **TITLE:** Spatial Uncertainty: Data, Modeling, and Communication (R03)
  (PA-15-011)
  **SPONSOR:** National Cancer Institute, National Institute of Environmental Health Sciences
  **Synopsis:** The goal of this funding opportunity announcement (FOA) is to facilitate multidisciplinary collaborations among researchers to promote research in identifying, quantifying, and communicating spatial uncertainty in health research to improve disease control and prevention. An additional goal of this reissuance is to facilitate integration of data collection, information technology, visualization tools, statistical models, and health communication to reduce spatial uncertainty in the planning, implementation, and evaluation of disease control programs. This FOA uses the NIH R03 small grant mechanism. The NIH R03 small grant mechanism supports discrete, well-defined projects that realistically can be completed in 2 years and that require limited levels of funding.
  Application Receipt/Submission Date(s): Multiple dates, see announcement.

- **TITLE:** Resource Program Grants in Bioinformatics (P41)
  (PAR-14-357)
  **SPONSOR:** Eunice Kennedy Shriver National Institute of Child Health and Human Development
  Application Receipt/Submission Date(s): Multiple dates, see announcement.

- **TITLE:** Building Genetics and Genomic Knowledge about Dental, Oral, and Craniofacial Diseases and Disorders (R01)
  (PA-14-347)
  **SPONSOR:** National Institute of Dental and Craniofacial Research
  Application Receipt/Submission Date(s): Multiple dates, see announcement.
• **TITLE:** Planning Grants for Clinical Trials of High Relevance to the NIGMS Mission (R34)  
  *(PAR-14-348)*  
  **SPONSOR:** National Institute of General Medical Sciences  
  Application Receipt/Submission Date(s): Multiple dates, see announcement.

• **TITLE:** Specialized Programs of Research Excellence (SPOREs) in Human Cancers for Years 2015 and 2016 (P50)  
  *(PAR-14-353)*  
  **SPONSOR:** National Cancer Institute (NCI)  
  **Synopsis:** This Funding Opportunity Announcement (FOA) invites applications for P50 Research Center Grants for Specialized Programs of Research Excellence (SPOREs). The program will fund P50 SPORE grants to support state-of-the-art investigator-initiated translational research that will contribute to improved prevention, early detection, diagnosis, and treatment of an organ-specific cancer (or a related group of cancers). For the purpose of this funding announcement, cancers derived from the same organ system (i.e., group of organs that perform common function) are considered related. Examples of such organ systems include gastro-intestinal, endocrine, circulatory, and other biological systems. Other programatically appropriate groups of cancers may include those centered around a common biological mechanism critical for promoting tumorigenesis and/or cancer progression in organ sites that belong to different organ systems. For example, a SPORE may focus on cancers caused by the same infectious agent, or sustained and promoted by dysregulation of a common signaling pathway. SPOREs are expected not only to conduct a wide spectrum of research activities, but also to contribute significantly to the development of specialized shared resources core facilities, improved research model systems, and collaborative research projects with other institutions. The research supported through this program must be translational in nature and must always be focused upon knowledge of human biology stemming from research using cellular, molecular, structural, biochemical, and/or genetic experimental approaches with the goal of a translational human endpoint within the project period of the grant. In addition, SPOREs must include both a Developmental Research Program for pilot studies and a Career Enhancement Program to foster careers in translational research related to the focus of the SPORE.  
  Application Receipt/Submission Date(s): January 27, 2015
